### **Quality Assurance Program:**

Romanyk Consulting Corp. (RCC) is committed to providing each customer with high-quality, best-value support. RCC's Quality Assurance (QA) Program consists of applying proven QA processes and procedures within each step of our tasks/projects. To ensure the highest quality in mission achievement, our QA program:

- Establishes and maintains a Quality Assurance Master Plan (QASP)
- Requires continuous process improvement
- Includes the adoption of industry best practices
- Defines a required communications plan for each task
- Establishes/requires periodic status reviews (internally and with customer stakeholders)
- Requires qualified and experienced personnel for each task
- Provides performance measures, metrics and verifiable performance monitoring
- Includes frequent direct communication with our personnel and our customers
- Incorporates training and lessons learned feedback
- Mandates maximum responsiveness to customer requirements
- Provides processes and procedures for early identification and resolution of performance issues
- Assigns individual responsibilities for monitoring and evaluating performance
- Requires quality reviews for each deliverable
- Implements adequate financial controls, processes and procedures
- Assures security requirements are met for each task

Quality Assurance promotes the delivery of reliable, complete, and best-value solutions. RCC's QA program establishes quality controls during the entire lifecycle of a task/project.
